CEO COMMENTARY

Harris H. Simmons, Chairman and CEO, commented, "We continue to generate strong growth in pre-provision net revenue, reflecting operating leverage improvement resulting from solid loan growth, a more profitable earning assets mix and controlled core operating expenses. We are on track to achieve the goals we established in mid-2015, leading to an efficiency ratio of 66% or better in 2016 and in the low 60% range in 2017 while accelerating revenue growth. Although energy-related credit losses and related provisions largely offset these gains, recent improvements in energy prices are encouraging, and credit performance in the rest of the portfolio has been stellar. We're pleased with the progress made during the guarter in building a stronger foundation for future growth and capital distributions."

Net interest income increased to \$453 million in the first quarter of 2016 from \$449 million in the fourth quarter of 2015. The net interest margin increased to 3.35% in the first quarter of 2016, compared to 3.23% in the fourth quarter of 2015. In the prior quarter, the Company realized interest income of \$13 million from loan recoveries and FDIC-supported loans that was not repeated in the first quarter. However, higher benchmark interest rates assisted in maintaining and increasing net interest income despite the aforementioned \$13 million of elevated interest income in the prior quarter. The increase in net interest income was primarily driven by a change in the mix of interest-earning assets; average money market investments declined by \$2.7 billion, much of which was deployed into loans and term investment securities. Additionally, net interest income benefited from high cost long-term debt that matured in the fourth quarter of 2015. Interest and fees on loans decreased in the first quarter of 2016 primarily as a result of the previously mentioned interest recoveries on commercial loans that occurred in the fourth quarter of 2015 and an increase of \$192 million in nonaccrual loans in the first quarter of 2016.

In the first quarter of 2016, to be consistent with industry practice, the Company reclassified its bankcard rewards expense from "Other" noninterest expense to "Other service charges, commissions and fees" in noninterest income in order to offset this expense against the associated revenue. Prior period amounts have been reclassified to reflect this change.

Customer-related fees in the first quarter of 2016 were stable compared to the prior quarter and increased 7% from the prior year period. Most of the year-over-year increase was due to an increase in credit card and interchange fees and loan fees. Total noninterest income for the first quarter of 2016 was \$117 million, compared to \$119 million for the fourth quarter of 2015.

¹ For information on non-GAAP financial measures see pages 15-17.

Noninterest expense for the first quarter of 2016 was \$396 million, compared to \$397 million for the fourth quarter of 2015, and \$393 million for the first quarter of 2015. The decrease in total noninterest expense from the fourth quarter of 2015 was primarily due to a decrease of \$17 million in other noninterest expense, in addition to reductions in professional and legal services, FDIC premiums, and credit-related expense. The decrease in other noninterest expense was mostly attributable to elevated fourth quarter payments related to the loss-sharing agreement with the FDIC and an elevated fourth quarter accrual for legal-related matters. The decrease in these expenses in the first quarter of 2016 was partially offset by an increase of \$22 million in salaries and employee benefits. The primary reasons for the increase in salaries and employee benefits were a seasonal increase of \$6 million in the accrual related to annual restricted stock awards, which historically occurred in the second quarter, a seasonal increase of \$7 million in payroll taxes, and a \$9 million difference in incentive compensation accrual due to performance related reductions in the fourth quarter of 2015.

The Company continued to make meaningful progress with its corporate restructuring and cost initiatives during the quarter. Adjusted noninterest expense for the first quarter of 2016 was \$396 million, compared to \$398 million for

the fourth quarter of 2015 and \$386 million for the first quarter of 2015. For information on non-GAAP financial measures see pages 15-17.

BALANCE SHEET ANALYSIS

| Loans held for investment, net of allowance | \$40,806 | \$40,043 | \$39,560 | \$ 763 | 2 | \$ 1,246 | 3 |

Loans and leases, net of unearned income and fees increased \$769 million, or 1.9% (7.6% on an annualized basis based on first quarter growth) to \$41.4 billion at March 31, 2016 from \$40.6 billion at December 31, 2015. Average loans and leases held for investment of \$41.0 billion during the first quarter of 2016 increased from \$40.3 billion during the fourth quarter of 2015. The increase in loans was widespread across products and geography with particular strength in commercial and industrial and commercial real estate term loans. Unfunded lending commitments were \$18.2 billion at March 31, 2016, compared to \$18.1 billion at December 31, 2015. The reserve for unfunded lending commitments declined by \$6 million as a result of improved credit quality assessments related to these obligations.

¹ Because many borrowers operate in multiple businesses, judgment has been applied in characterizing a borrower as oil and gas-related, including a particular segment of oil and gas-related activity, e.g., upstream or downstream; typically, 50% of revenues coming from the oil and gas sector is used as a guide.

² Calculated as the ratio of annualized net charge-offs for each respective period to loan balances at each period end.

During the first quarter of 2016, oil and gas-related loans increased \$21 million, or 1%, and total oil and gas credit exposure decreased by \$109 million, or 2%. Further attrition of total oil and gas-related loan balances and commitments during the next several quarters is expected, but at a slower pace than recent quarters. Unfunded lending commitments decreased by \$130 million, primarily in the oilfield services and exploration and production portfolios.

Consistent with management's expectations, the majority of loan downgrades in the first quarter of 2016 reflected deterioration in the financial condition of companies in the oilfield services and the exploration and production portfolios. Oil and gas-related loan net charge-offs were \$36 million in the first quarter of 2016 and were predominantly in the oilfield services portfolio, compared to \$24 million in the fourth quarter of 2015. Nonaccruing loans increased by \$220 million in the first quarter of 2016, primarily in the exploration and production and oilfield services portfolios. Approximately 91% of oil and gas-related nonaccruing loans were current as to principal and interest payments as of March 31, 2016, up from 71% as of December 31, 2015. The Company has a substantial allowance of 8.1% for credit losses against the oil and gas-related loan portfolio.

| Provision for loan losses | 42 | 23 | (1) | 19 | 84 | 44 | (2,921) |

Outside of the oil and gas-related portfolio, credit quality improved during the quarter. As a result of the credit quality deterioration in the oil and gas-related portfolio, nonperforming assets increased 55% to \$552 million at March 31, 2016 from \$357 million at December 31, 2015 and classified loans increased 12% to \$1.5 billion at March 31, 2016 from \$1.4 billion at December 31, 2015. The ratio of nonperforming assets to loans and leases and other real estate owned increased to 1.33% at March 31, 2016, compared to 0.87% at December 31, 2015. The allowance for credit losses was \$681 million at March 31, 2016 and December 31, 2015, which was 1.64% and 1.68% of loans and leases, respectively.

Total net charge-offs were \$36 million in the first quarter of 2016, or an annualized 0.35% of average loans, compared to \$13 million, or an annualized 0.13% of average loans, in the fourth quarter of 2015. The Company provided \$42.1 million for loan losses during the first quarter of 2016, compared to \$22.7 million during the fourth

quarter of 2015. The increase in the provision for loan losses was due to continued weakness in the oil and gas sector.

The Company's preferred dividends decreased by \$2.6 million in the first quarter of 2016 as a result of the tender offer the Company completed in the fourth quarter of 2015 to purchase \$176 million of its Series I preferred stock for an aggregate cash payment of \$180 million. As reported separately on April 25, 2016, the Company has launched a tender offer for up to \$120 million par amount of certain outstanding shares of preferred stock.

Accumulated other comprehensive income (loss) improved to \$(12) million from \$(55) million primarily as a result of improvement in the fair value of the Company's available-for-sale securities portfolio due largely to changes in the interest rate environment.

Tangible book value per common share increased to \$28.20 at March 31, 2016, compared to \$27.63 at December 31, 2015.

The estimated Basel III common equity tier 1 ("CET1") capital ratio was 12.14% at March 31, 2016, compared to 12.22% at December 31, 2015. The fully phased-in ratio was not substantially different.

This press release presents the non-GAAP financial measures previously shown. The adjustments to reconcile from the applicable GAAP financial measures to the non-GAAP financial measures are included where applicable in financial results presented in accordance with GAAP. The Company considers these adjustments to be relevant to ongoing operating results.

The Company believes that excluding the amounts associated with these adjustments to present the non-GAAP financial measures provides a meaningful base for period-to-period and company-to-company comparisons, which will assist regulators, investors, and analysts in analyzing the operating results or financial position of the Company and in predicting future performance. These non-GAAP financial measures are used by management to assess the performance of the Company's business or its financial position for evaluating bank reporting segment performance, for presentations of Company performance to investors, and for other reasons as may be requested by investors and analysts. The Company further believes that presenting these non-GAAP financial measures will permit investors and analysts to assess the performance of the Company on the same basis as that applied by management.

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although non-GAAP financial measures are frequently used by stakeholders to evaluate a company, they have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of results reported under GAAP.
